

# ComEdge Enterprise Solutions

## ComEdge Messenger Server

---

Fast, reliable and economical delivery of information between a business and its customers is extremely important. Today's customers, suppliers, distributors and employees demand up-to-the-minute information to be available quickly and easily.

The **COMEDGE MESSENGER SERVER** drives workflow efficiency by enabling instantaneous notification by email or fax about customer orders, ship notifications, out-of-stock notices, and the dozens of other time sensitive documents. An intuitive interface allows any document generated by **COMEDGE** to be directed to the dedicated **MESSENGER SERVER** in the same way they would be directed to a printer.

- Order Acknowledgement
- Purchase Order
- Shipment Notification
- Spooled Printer Output
- Invoices
- Accounts Receivable Statement
- Credit Letter

Documents are then either routed directly to the fax software, or converted to a PDF document, an industry standard format, and then sent as an attachment by email. Using the free Adobe Acrobat reader software, customers can use any computer platform to view and print the PDF document exactly the way you want them to see it, eliminating confusion with a professional quality document. Timely message completion notices inform users of successful message transmission and can alert users to any transmission problems. Easy to navigate menus allow users to check status of messages, resend messages or even view the document that was emailed or faxed.

This fast, efficient tool streamlines many day-to-day processes, saving time, money and resources. The **COMEDGE MESSENGER SERVER** even integrates with your outbound sales/marketing plan by providing broadcast capabilities to reach your customers and new prospects.

The **COMEDGE MESSENGER SERVER** is a cost-effective addition to your **COMEDGE ENTERPRISE SOLUTION** that will impress a professional image to your customers while increasing your power over information management.
