

## COMEDGE DOCUMENT MANAGEMENT (DM)

ComEdge Document Manger (DM) was developed specifically to integrate with our flagship product, ComEdge Enterprise Solutions. Whether the document pertains to jobs, vendors, customers, or contacts, ComEdge DM associates virtually any document seamlessly with a few simple clicks. A web interface allows you view and work with the documents on any PC that supports Internet Explorer or Firefox browsers.

ComEdge DM was designed with our customers in mind by putting as few steps as possible between scanning the document and ComEdge. The DM software also allows for color, black and white, grayscale and duplex scanning with varying degrees of DPI. The major benefit of duplex scanning is that blank pages are ignored and not saved which saves the customer disk space and time by not viewing blank images.

Add notes and highlights to a document for internal use without changing the original scanned document. You can also export the files as a PDF or zip file,

ComEdge DM also offers the ability to drag and drop from virtually anywhere on the pc to the ComEdge DM program. This means any document such as emails, contact information, word documents, Excel spreadsheets, pictures, CAD files, etc., can be saved to ComEdge DM. Documents can also be saved from the clipboard, CD-ROM, DVD, flash drive, etc...
