

ComEdge Mobile Device Applications

The migration to wireless and mobile applications is now fully underway.

Extend the power of ComEdge to your increasingly mobile staff with mobile applications that seamlessly integrate with the entire ComEdge Enterprise Suite and many other vendors' software solutions. Software Alternatives has the knowledge and experience to develop custom software solutions for all of your mobile computing needs. Software Alternatives works with businesses and manufacturers to deliver robust, reliable software and hardware solutions specifically tailored to our customer's needs.

Mobile Web App

Our Mobile Web App will help you improve your field service productivity, improve your delivery services and enhance your customer's experience by providing real time information. This Mobile App is a real time Web Application that works on mobile devices such as smart phones and computer tablets.

- Increase productivity by streamlining communications and eliminating paperwork
- Get real-time updates on work status and technician location
- Improve response and decision-making in the field
- Improve Inventory Control
- Improve customer satisfaction by providing on time delivery and service calls
- Cut costs by reducing non-productive work hours
- Improve revenues by using on-site data capturing and credit card processing
- Full Credit Card Integration

Rugged Computing for Real World Mobility

Tablets, rugged handheld computers and PDAs are designed for the task at hand and are likely to become the primary computing device in the next few years for many of your employees. These computing devices offer mobility, flexibility and can be adapted for a variety of purposes including Time and Attendance, Production Tracking, Delivery Tracking, Inventory Control and Service Industry Tracking. Our mobile applications work directly with and are fully integrated with the ComEdge suite of applications which in turn saves you time and money.

Software Alternatives designs custom mobile software for these tools. The combination of mobile hardware and specialized software provides the core foundation necessary for efficient and effective Mobile Business.
